

## Z-KISS™ System

Concealed, frameless interior glass cladding system – meticulously engineered and factory-applied. Integrates Bendheim's customizable opaque glass varieties with our proprietary KISS™ attachment method, which features fewer components and stronger connections.

The result is tougher glass cladding that is fully fabricated, faster and easier to install.

# BENDHEIM

## Z-KISS™ Benefits

- Engineered, factory-applied, fully integrated system
- Requires fewer horizontal supports than traditional Z-clip systems
- Provides a reliable mechanical support for the dead load of the glass
- Bendheim offers shop drawing services to facilitate project design and installation

A better, "simpler" engineered solution, Bendheim's patent-pending Z-KISS cladding system features fewer parts and stronger connections for a superior product that is also easier to install. The "out-of-box" installation saves time and labor costs – only requires hand tools and proper wall-mounting screws based on your substrate (Sheetrock, concrete, brick, etc.). Compatible with safety glass up to 60" x 120"; glass thicknesses ranging from 1/4" to 1/2". Can be specified with an integrated kick plate in a wide range of custom colors (special order).

## Fully Customizable Glass Options (Safety Tempered/Laminated)

Select from hundreds of in-stock glass varieties – in a range of colors, patterns, and finishes – or collaborate with our design consultants to create a custom design.

### Back-Painted

- Unlimited colors
- Precision spectrometer matching
- Independently-tested, baked-in HardShell® color coatings
- Choose from gloss (fire-polished) or SatinTech™ anti-glare matte (etched) finishes, decorative patterns, writable (dry-erase) and projectable surfaces

### Mirrored

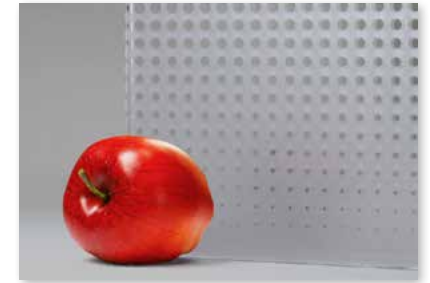

- Dozens of in-stock varieties and virtually unlimited custom colors
- Light-diffusing, reflection-bending textures
- Etched patterns
- Gloss or anti-glare matte finishes
- Amplifies the light to create a sense of openness
- Lends depth to wall surfaces

### Decorative Laminated

- Tremendous design flexibility with a wide range of interlayers (textiles, metals, wood veneers, rice papers, etc.)
- Gloss, matte, or textured surfaces
- Provided back-painted or mirrored for Z-KISS applications

### Digitally Printed

- Offers the greatest design flexibility
- Virtually unlimited custom colors, patterns, images, fades, etc.
- Gloss, matte, or textured surface options
- Provided back-painted or mirrored for Z-KISS applications
